4. Adjust back carry
5. Click!
6. Adjust hip seat
7. Ensure baby is secure
WARNING: FALL AND SUFCCATION HAZARD

Read all instructions before assembling and using the Carrier and Infant insert.

IMPORTANT! KEEP INSTRUCTIONS FOR FUTURE REFERENCE.

FALL HAZARD – Baby can fall through a wide leg opening or out of Carrier.
• Before each use, make sure all fasteners are secure.
• Take special care when leaning or walking.
• Never bend at waist; bend at knees.
• DO NOT use carrier for babies weighing less than 7 lbs (3.2 kg). Except as instructed below, only use this carrier for children between 12 lbs (5.5 kg) and 45 lbs (20 kg).
• Use the LILLEbaby® Infant Insert (sold separately) for babies between 7 lbs (3.2 kg) and 12 lbs (5.5 kg) and continue using the infant insert for babies over 12 lbs (5.5 kg) until baby demonstrates strong and consistent head/neck control.

SUFOCATION HAZARD – Babies under 4 months can suffocate in this product if face is pressed tight against your body.
• Do not strap baby too tight against your body.
• Allow room for head movement.
• Keep baby’s face free from obstructions at all times.

WARNING:
• Constantly ensure that baby is breathing normally, that mouth and nose are unobstructed from your skin and fabric, and that baby’s chin is not resting on his chest as his breathing may be restricted, which could lead to suffocation.
• Your balance may be adversely affected by your movement and that of your child.
• Take care when bending or leaning forward.
• This Carrier is not suitable for use during sporting activities.

IMPORTANT: Check to assure all buckles, snaps, straps and adjustments are secure before each use. Regularly check that buckles, snaps, straps and adjustments are secure and have proper tension and placement. Check for ripped seams, torn straps or fabric and damaged fasteners before each use.

Baby must always face the wearer in this carrier. Do not overextend baby's legs. Do not carry baby facing out in this carrier. Never leave baby unattended in or with the carrier. Baby’s arms, legs and feet need to be observed regularly while in the Carrier to ensure that they are not constricted by the Carrier. Check that baby’s airway is clear and that baby is breathing normally at ALL TIMES. Check often to make sure baby’s face is uncovered, clearly visible, and away from caregiver's body at all times. Make sure baby does not curl into a position with the chin resting on near baby’s chest. Baby's chin should NEVER rest on baby’s chest because this may close baby’s airway. There should always be at least two fingers width clearance before baby’s chin. Premature infants, infants with respiratory problems, and infants under 4 months are at greatest risk of suffocation.

Ensure proper placement of baby in product including leg placement. Check baby's position regularly to make sure that the baby is properly seated in the Carrier, centered with legs extended and head upright. Only use the back and hip carry position when baby has demonstrated strong and consistent head and neck control.

This Carrier is only intended for use by healthy adults. Only use the Carrier if you understand the instructions and safety features, and is confident and comfortable with respect to the use of the Carrier. Never use Carrier when balance or mobility is impaired because of drowsiness, exercise, or medical conditions. Never use Carrier while engaging in activities such as cooking and cleaning which involve a heat source or exposure to chemicals. Keep away from fire. Never wear Carrier while driving or being a passenger in a motor vehicle. Never unbuckle the waist belt while the baby is in the Carrier. Carrier should not be used by a person with health problems that might interfere with the safe use of the product. If the person using the Carrier develops shoulder, back, or neck problems, discontinue its use and consult a qualified medical professional. Discontinue use of the Carrier if the baby exhibit signs of discomfort. Carrier should be positioned so baby is close to your face (close enough to kiss). For those with longer torso, try wearing around the belly button level. For those with shorter torso, try wearing the waist belt around your hips.

Nursing in carrier: Loosen the shoulder straps slightly to allow your baby’s head to be lower. The hood can be used for privacy. Important: Always reposition baby after feeding so baby’s face is not pressed against your body.

Disclaimer: LILLEbaby® uses only the highest quality and safest dyes possible to ensure a product that is free from harmful chemicals, but will retain its color. Colors may fade with washing. LILLEbaby® cannot be held responsible for faded colors due to washing.

Warranty: LILLEbaby® warrants its products against defects in workmanship and materials and will either repair or replace, during the first 12 months after purchase, any LILLEbaby® product that is defective. Proof of purchase is required and product must be returned for warranty service. Warranty coverage does not extend to damage caused by misuse of the product or use that is not in accordance with user instructions, or to any product that has been modified from its original construction in any way. Different or additional warranty rights may exist in the purchaser’s jurisdiction. To the extent that different or additional warranty rights exist under the laws of the purchaser’s jurisdiction, those warranties shall apply and be in addition to the warranty rights. For warranty claims, please contact LILLEbaby Customer Service.

WASH INSTRUCTIONS: Before washing, connect all buckles and snaps. Do not machine wash frequently. Machine wash cold. Use mild detergent. Do not use detergents with bleach, dyes, chlorine, or brighteners. Store in dry place when not in use. Tumble dry on low.

IMPORTANT: KEEP INSTRUCTIONS FOR FUTURE REFERENCE.
